

Flat Integrated Truss Curtain

Can't afford a curtain system? Think again. Similar bang, less bucks. Our new Flat Integrated Truss curtain system offers Wadsworth quality and expert engineering with a lower price tag. And, we've got you covered from start to finish. We provide it all – the initial drawings to automated control, including the drive unit. Wadsworth alone offers a complete solution.

FLAT INTEGRATED TRUSS CURTAIN

Flat system only, not available for blackout or slope-flat-slope applications

FEATURES

- Each system is custom engineered
- Mounts directly to bottom cord, which is a straight connection between gutters
- Fabric glides between stationary monofilament lines
- Positive drive rack and pinion system means no cables to adjust
- Steady, moderate pace of system allows you to regulate cold air spill
- Continuous duty drive unit – won't overheat or stall
- Built-in internal limits and safety torque limits
- Durable fabric resists UV, heat and chemicals
- Small bundle size ensures minimal shade when the system is uncovered
- Option to include a perimeter seal increasing energy savings when covered
- Easy installation for new construction and retrofitting
- Access to your bottom cord for hanging baskets

BENEFITS

- Extremely durable and virtually maintenance free
- Manage your system with a manual curtain interface panel with timers or connect to environmental control for a higher level of management
- When managed by an environmental control:
 - Up to 40% in energy savings
 - Cools greenhouse 10° - 15° on hot days
- Provides heat retention at night when 80% of heating occurs
- Shading provides comfort for customers and staff
- Creates more uniform temperature, humidity and light conditions
- Improves crop quality
- Reduces watering
