

Service Visits

Are you getting the full benefit from all the features on your environmental control? Our team of experts have the skills and knowledge to make sure your Wadsworth equipment continues to run at its best. Routine service and maintenance can reduce costly repairs and replacements, prevent product failures, and unexpected downtime.

WHAT WE PROVIDE

Annual service visit – a Wadsworth expert comes onsite

TRAINING

- We'll meet with your staff to share the latest features and how to utilize them at your facility
- Train new employees on Wadsworth's systems

MAINTENANCE

- Validate sensor readings and make recommendations
- Evaluate temperature and humidity sensors and replace if needed, or leave sensor board for future use
- Check filter condition and replace as needed

EQUIPMENT TESTS

- Assess if all equipment is functioning optimally
- Review options to repair or replace equipment as needed
- Work as a liaison to resolve issues with other suppliers' equipment

SETTINGS REVIEW

- Review equipment settings. Report and discuss any settings outside recommended parameters
- Review graphs to identify cycling or unusual patterns

UPDATES

- Update control software and firmware

A COMPREHENSIVE SERVICE VISIT REPORT

Biannual Review – remote review of settings with a Wadsworth expert

- Ensure settings are optimized for the season or crop
- Training on how to enter settings for desired results
- Evaluate if equipment is operating properly
- Report of online service consultation
- These sessions and may be recorded

Discounts

- 10% discount on any additional in-person visits or additional settings reviews.
