# STEP Up Compass
Software

With STEP Up Compass software, more control means more choices. STEP Up Compass software is uniquely designed to integrate with one or multiple STEP Up controllers, allowing three ways to adjust and track your greenhouse environment: using the STEP Up control, your PC, or remotely through a mobile device.

Main menu shows current conditions.

Display of current day's temperatures in 15-minute increments.

FEATURES

- Allows remote access and management of a single or multiple STEP Up controllers by PC and your mobile device
- Displays historical data in two formats: as tabs or graphs
- Stores snapshots of current settings – useful for historic comparisons, restoring settings and a back-up for current settings
- Compare data for specific time periods to fine tune crop environments for peak performance and energy savings
- Temperature tracking in 15-minute increments
- Instinctive autodiscovery feature scans the system to locate all connected STEP Up controls
- Password protection includes three user levels with separate permissions: Administrator, Operator and User
- Compatible with Windows 10, Windows 8 and Windows 7 in both 32 and 64 bit
- Requires available USB port
